

Lake Michigan Academy And Turning Pages Present: “Catching the Summer Slide” 2020

Lake Michigan Academy and Turning Pages are here to help you catch the summer slide! If you are worried your child will not be ready for school this fall, we can help.

Response to the Need

Lake Michigan Academy and Turning Pages have designed a plan to assist parents and students with their unique learning needs. This plan allows for flexibility, differentiation, and remedial interventions designed to meet individual student needs as well as families' summer schedules.

Summer Options for Families

Summer options will be delivered remotely by well trained teacher tutors. While we predict many students will benefit most by engaging in a one on one setting, some students, based on their needs, may be placed with one or two additional students with identified similar needs. Students will be pretested in the areas requested by the parent. A plan of intervention will be developed to specifically address the gaps or needs presented in their learning profiles. At the conclusion of the session, students will be post-tested. A summary of the testing, the interventions, and other observational behavior will be presented to the parents who can then use this information when reengaging in their formal educational program in the fall. This assessment data will be valuable as many students were not tested in the spring.

One of the greatest features of our summer program is that all options will be scheduled between the parent and the tutor. The session could be completed in a time frame that is appropriate and convenient for all parties involved. Our Orton-Gillingham tutoring is only offered in one hour blocks. All of our other options are offered in sessions lasting 30 minutes.

Apply today at www.mylma.org/summer!

Catching the Summer Slide
